PROFESSIONAL SUMMARY

Informatics graduate with practical experience across project team leadership, business analysis, mobile development, and database administration. Has led development teams through Agile delivery cycles at mlab, contributed to business analysis engagements at Ricoh South Africa, and built academic-level database systems during studies at Tshwane University of Technology. Holds certifications in Azure AI and React development. Committed to delivering scalable, user-focused technology solutions aligned to business objectives.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, HTML, CSS, React

Databases: SQL Server, PostgreSQL, Microsoft Access, SQL Server Management Studio (SSMS)

Mobile and Web Development: Android (Java), React, responsive UI implementation, REST API integration

Business Analysis: Requirements elicitation, BRS documentation, UML, ERD, DFD, process mapping, BPMN, UAT

Project Management: Agile (Scrum), sprint planning, risk management, stakeholder communication, SDLC

Tools and Platforms: DocuWare, VS Code, NetBeans, Git and GitHub, Microsoft Office Suite, Azure

WORK EXPERIENCE

Project Team Leader and Mobile Developer

2025 - 2026

mlab (CodeTribe Academy), Pretoria

- Led a development team through Agile/Scrum delivery cycles including sprint planning, daily stand-ups, and retrospectives
- Defined project scope, assigned tasks, tracked milestones, and managed risk to ensure on-time delivery of software solutions
- Developed mobile and web applications using React, building component-based interfaces with hooks and state management
- Built Android mobile applications using Java, integrating CRUD operations with back-end SQL databases
- Integrated REST APIs into mobile and web applications for real-time data retrieval and updates
- Managed source code using Git and GitHub including branching, merging, and pull request workflows
- Coached team members on development best practices, improving overall code quality and delivery speed
- Served as point of contact between the technical team and stakeholders, presenting progress updates and demos

Business Analyst

2026

Ricoh South Africa, Sandton

- Conducted requirements-gathering sessions and stakeholder interviews to define system scope and business objectives
- Produced business requirements specifications (BRS), use case diagrams, process maps, and workflow documentation
- Translated business needs into detailed functional and non-functional requirements for development teams
- Facilitated user acceptance testing (UAT) sessions and captured stakeholder feedback for iterative refinement
- Applied BPMN and DFD techniques to model as-is and to-be business processes
- Collaborated with technical teams to ensure solutions aligned with documented business requirements

ACADEMIC AND PROJECT EXPERIENCE

Database Administrator (Academic Collaborative Project)

2022 - 2025

Tshwane University of Technology (TUT)

- Designed and implemented normalised relational databases in PostgreSQL and SQL Server, including ERD modelling and schema definition
- Wrote complex SQL queries, stored procedures, views, and triggers to support business logic and reporting requirements
- Performed database performance tuning and indexing to optimise query execution
- Maintained data integrity through primary key, foreign key, and CHECK constraint design
- Documented database architecture and produced data dictionaries for handover and maintenance purposes

Software Developer (Student Information System)

2023 - 2024

Tshwane University of Technology (TUT)

- Developed system modules using Java, implementing core functionality and business logic
- Designed and managed relational databases in PostgreSQL with full normalisation
- Created system diagrams (UML, ERD) to document architecture and data flows

Web Developer (Web Portal Project)

2023 - 2024

Tshwane University of Technology (TUT)

- Built responsive, cross-browser-compatible user interfaces using HTML, CSS, and JavaScript
- Implemented interactive front-end features and UI enhancements for improved usability
- Managed source code and version history using Git and GitHub

Digital Document Management (DocuWare)

2026

Ricoh South Africa

- Hands-on experience with digital document routing, indexing, and retrieval in DocuWare
- Applied workflow automation and cloud-based document management processes
- Implemented structured archiving, digital file organisation, and records management best practices

EDUCATION

National Diploma in Informatics

2022 - 2025

Tshwane University of Technology (TUT)

- Core modules: Systems Analysis and Design, Database Management, Software Development, Business Analysis, Project Management, Web Development

CERTIFICATIONS

AI-901: Introduction to AI in Azure

04 May 2026 Impactful, Powered by LRMG

CodeTribe Coding Academy - React Course (IITPSA CPD Accredited)

31 March 2026 mlab
